

Simplified Agile Interview Questionnaire

For Industry Visit - Software Project Management (SE3080)

Category 1: General Questions (All Roles)

- Could you tell us a bit about your company and how long you've been using Agile or Scrum practices?

(Covers: Company Background / Agile Adoption)

- How does your team make sure quality is built into the product from the very beginning?

(Covers: Quality Management / Definition of Done)

- How do you usually start a new sprint — what steps or discussions happen before work begins?

(Covers: Scope Management / Sprint Planning)

- Do you follow pure Scrum or have you made changes to better fit your company's way of working?

(Covers: Customization vs. Standard Agile Practices)

- What tools or platforms do you mainly use for collaboration and tracking progress (like Jira, Trello, etc.)?

(Covers: Tools & Techniques / Communication Management)

- What has been your biggest challenge as a Scrum team, and how did you overcome it?

(Covers: Problem Solving / Risk Management)

- What key lessons or advice would you share with a university team doing its first Scrum project?

(Covers: Knowledge Sharing / Continuous Improvement)

Category 2: Product Owner (PO) Specific Questions

- What are your main responsibilities as the Product Owner in this project?

(Covers: Roles & Responsibilities)

- How do you decide what goes into the Product Backlog and how do you keep it updated?

(Covers: Scope Management / Backlog Refinement)

- How do you define priorities — what factors help you decide what comes first?

(Covers: Time & Scope Management / Prioritization)

- If a new feature request comes in during an ongoing sprint, how do you handle that change?

(Covers: Integration Management / Change Control)

- How do you work with the team to estimate effort or complexity (for example using Story Points)?

(Covers: Cost Estimation / Planning)

- How do you communicate progress and priorities to stakeholders outside the team?

(Covers: Communication Management / Transparency)

- What kind of feedback do you get from Sprint Reviews, and how do you use it for the next sprint?

(Covers: Monitoring & Control / Stakeholder Feedback)

- Can you share an example of a time you had to adjust the product roadmap based on user or business feedback?

(Covers: Agile Adaptability / Change Management)

- What do you think makes a Product Owner successful in an Agile team?

(Covers: Leadership & Stakeholder Management)

- What tools or documents do you rely on most for managing the product vision and backlog?

(Covers: Project Documentation / Integration Management)

Category 3: Scrum Master (SM) Specific Questions

- What are your main responsibilities as a Scrum Master in this project?

(Covers: Roles & Responsibilities)

- How do you help the team stay on track and remove obstacles during a sprint?

(Covers: Resource & Schedule Management)

- What kind of ceremonies or meetings do you facilitate, and how often?

(Covers: Scrum Ceremonies / Communication Management)

- How do you make sure everyone in the team understands and follows Scrum practices?

(Covers: Process Management / Coaching)

- How do you identify risks early and help the team handle them?

(Covers: Risk Management / Mitigation)

- What tools or charts (like Burndown or Velocity charts) do you use to track sprint progress?

(Covers: Monitoring & Control / Schedule Management)

- How do you encourage collaboration and communication within the team?

(Covers: Team Development / Servant Leadership)

- Can you share an example of a challenge the team faced and how you helped solve it?

(Covers: Problem Solving / Facilitation)

- How do you make sure lessons learned from retrospectives are applied in later sprints?

(Covers: Knowledge Management / Continuous Improvement)

- In your view, what qualities make a good Scrum Master?

(Covers: Leadership & Team Culture)

Category 4: Development Team (DT) Specific Questions

- Could you explain what your role in the current project involves?

(Covers: Roles & Responsibilities)

- How do you make sure you fully understand the user stories before starting work on them?

(Covers: Scope Management / Requirements Understanding)

- How does your team estimate effort for tasks or user stories?

(Covers: Cost Estimation / Planning)

- What practices do you use to ensure quality in your code or product (like testing, code reviews, pair programming, etc.)?

(Covers: Quality Management / Testing)

- How do you raise and discuss risks or blockers during a sprint?

(Covers: Risk Management / Daily Scrum)

- How do you usually conduct your Daily Scrum meetings — what works best for your team?

(Covers: Scrum Ceremonies / Collaboration)

- How do you collaborate with the Product Owner and Scrum Master during a sprint?

(Covers: Integration & Communication Management)

- What improvements have you made as a team after past retrospectives?

(Covers: Lessons Learned / Continuous Improvement)

- What tools or techniques do you find most helpful in your day-to-day work?

(Covers: Tools & Techniques / Productivity)

- What's one thing you've learned from working in an Agile environment that you'd share with new teams?

(Covers: Knowledge Sharing / Team Growth)
